

9-10 JUNE 2022 | SPLIT, CROATIA

ENVIRONMENT, ENERGY & E-MOBILITY CONFERENCE

Sustainable life 2050

POWERED BY

RIMAC

CHALLENGE PARTNER

Intro

Climate change and sustainable development are one of the most important global topics today. As a society, we are constantly exploiting insubstantial natural resources which creates irreversible damage to climate, biodiversity, and future life on Earth.

We came to a turning point and have to make a transition to green. The green transition includes technological innovations, changing of human habits and behaviour patterns. Green transition has started but its slow. It must be prioritized immediately if we want an opportunity for future life for ourselves and the generations to come.

The GREEN FUTURE conference provides an opportunity to learn what the green transition includes, how technology can help, and what sources of funding are available to help make it happen.

Green Future Conference

The main goal of the GREEN FUTURE Conference is bringing together international and domestic technology leaders, companies, institutions, scientists and other stakeholders from the sustainable development sector and to encourage innovation and investment in new technologies that guarantee sustainability.

Part of a Conference agenda will include competition for startups, which will be invited to present innovative solutions in the field of the sustainable development.

THE UNIQUE MOTTO OF THIS INTERNATIONAL TECHNOLOGY CONFERENCE IS

S U S T A I N A B L E L I F E 2 0 5 0

CALL TO ACTION

GREEN FUTURE Conference will communicate the requirements and goals for green and digital transition that are set for entrepreneurs and the public sector, who need support in information on processes and concepts of greentransition, sources of funding incentive for innovation and their faster and wider practical application.

Prize fund for startups

Agenda

More details about agenda see on our website

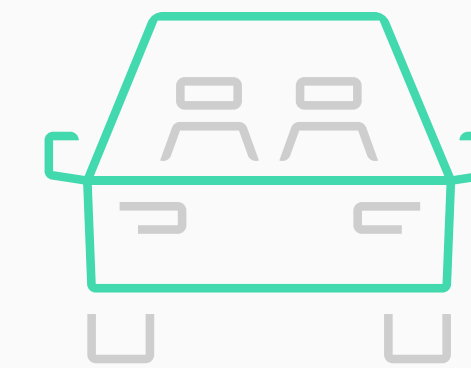

Environment

How can technology help us with adapting to climate change? Do we really understand that climate change is happening due to the habits of every single one of us?

Energy

What are the alternative energy sources and at what stage are they in technological development and application in everyday use?

E-mobility

What are the alternative forms of (urban) mobility? How much are we really willing to change policies, our own habits and comfort?

VENUE

Croatian National Theater

Green Future Conference will be held in the Croatian National Theater in Split, located in the center of Split. Beautiful historic building from the end of the 19th century will give a special charm to the conference, which in the best possible way combines cultural heritage of Split with the greatest technological achievements in the field of sustainable development.

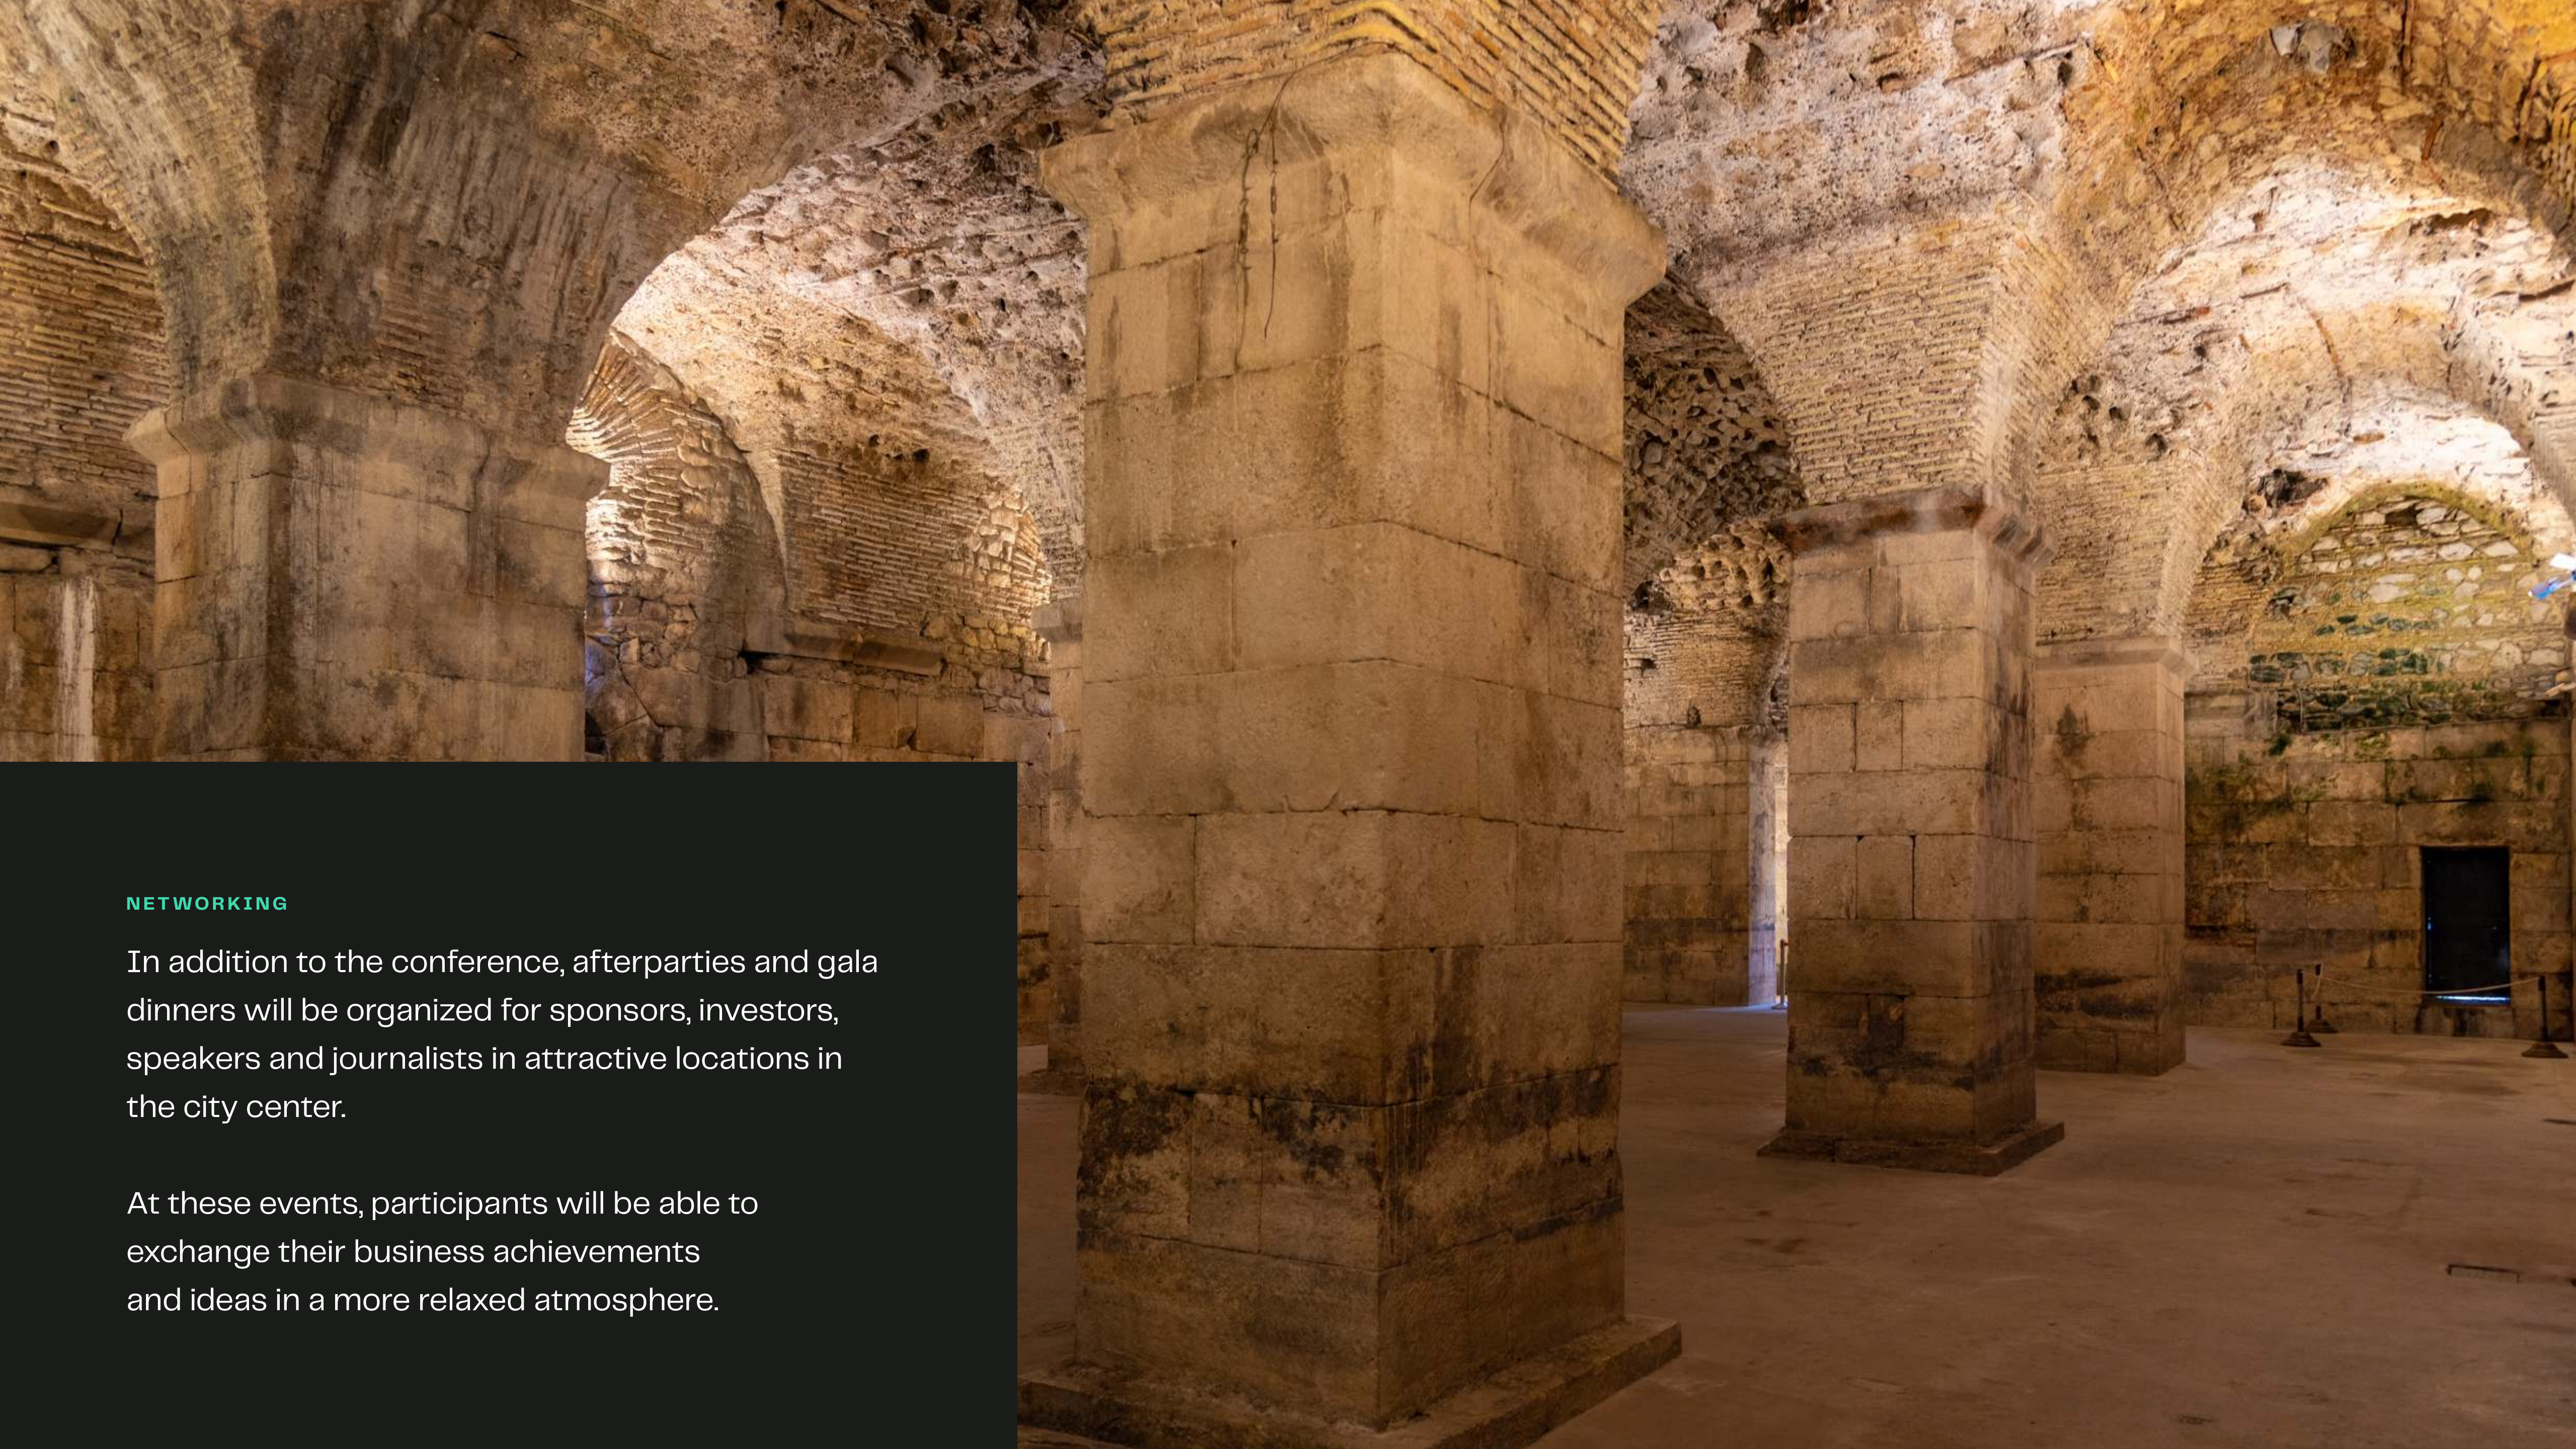

CENTER OF THE MEDITERRANEAN

City of Split

Split is one of the most beautiful cities in the Mediterranean and as a tourist center of this part of Europe is an ideal city for organizing international business conferences. The Green Future Conference will be held during the tourist season on June 8–10, 2022.

Beautiful historic city center, as well as numerous restaurants, cocktail bars and beautiful city beaches, guarantee a lots of entertainment opportunities for the participants outside the working part of the conference.

NETWORKING

In addition to the conference, afterparties and gala dinners will be organized for sponsors, investors, speakers and journalists in attractive locations in the city center.

At these events, participants will be able to exchange their business achievements and ideas in a more relaxed atmosphere.

Partnership

We are proud that the GREEN FUTURE conference was supported by world-renowned technology companies from Croatia, RIMAC AUTOMOBILI and INFOBIP.

Our partnership with two 'unicorns' with valuations of over one billion us dollars will help GREEN FUTURE conference create a lasting and substantial impact.
